

## THESIS TOPICS

**Orsolya Mate PhD assistant professor**  
e-mail address: [orsolya.mate@etk.pte.hu](mailto:orsolya.mate@etk.pte.hu)

Name of the supervisor:	<b>András Oláh PhD, Orsolya Máté PhD</b>
Workplace of the supervisor:	PTE ETK Institute of Nursing Sciences, Basic Health Sciences and Health Visiting
Theme title:	<b>Comparative research of the international APN (Advance Practice Nursing) qualification curriculums</b>
Problem identification:	In most of the OLCED's countries exists a master level APRN training, what output competences are very widespread. The aim of the survey is to bare the conditions of these trainings that can ensure wide competence.
Number of the thesis what may be submitted:	10
Relevant research methods:	document analysis
Necessary and relevant statistic methods:	descriptive statistics
Which major/specialization can advertise the theme:	Nursing and Patient Care major Nursing specialization, BSc nursing, MSc nursing

Name of the supervisor:	<b>Orsolya Máté PhD, Dorina Pusztai</b>
Workplace of the supervisor:	PTE ETK Institute of Nursing Sciences, Basic Health Sciences and Health Visiting
Theme title:	<b>The survey of giving bad news in oncological practice</b>
Problem identification:	During everyday work, the medical workers have to give bad news to the patients, which practice is not really examined in Hungary. The survey approaches the theme from the patients' and workers' point of view as well.
Number of the thesis what may be submitted:	5
Relevant research methods:	questionnaire
Necessary and relevant statistic methods:	descriptive statistics, chi-square test, ANOVA, t-test
Which major/specialization can advertise the theme:	Nursing and Patient Care major Nursing specialization, BSc nursing, MSc nursing

Name of the supervisor:	<b>Orsolya Máté PhD, Dorina Pusztai</b>
Workplace of the supervisor:	PTE ETK Institute of Nursing Sciences, Basic Health Sciences and Health Visiting

Theme title:	<b>Role of humour in medical communication</b>
Problem identification:	Humour is important part of our life. The survey is looking for answers that how humour takes part in medical communication, between medical workers and between workers and patients.
Number of the thesis what may be submitted:	4
Relevant research methods:	questionnaire, observation
Necessary and relevant statistic methods:	descriptive statistics, chi-square test, ANOVA, t-test
Which major/specialization can advertise the theme:	Nursing and Patient Care major Nursing specialization, BSc nursing, MSc nursing

Name of the supervisor:	<b>Orsolya Máté PhD, Dorina Pusztai</b>
Workplace of the supervisor:	PTE ETK Institute of Nursing Sciences, Basic Health Sciences and Health Visiting
Theme title:	<b>The survey of giving bad news in pediatric practice</b>
Problem identification:	During everyday work, the medical workers have to give bad news to the patients, which practice is not really examined in Hungary. More less the number of those studies where the patient and the informed is not the same person. The survey approaches the theme from the patients' and workers' point of view as well in a very sensitive environment, the pediatric care.
Number of the thesis what may be submitted:	5
Relevant research methods:	questionnaire, observation
Necessary and relevant statistic methods:	descriptive statistics, chi-square test, ANOVA, t-test
Which major/specialization can advertise the theme:	Nursing and Patient Care major Nursing specialization, BSc nursing, MSc nursing

Name of the supervisor:	<b>Orsolya Máté PhD, Dorina Pusztai</b>
Workplace of the supervisor:	PTE ETK Institute of Nursing Sciences, Basic Health Sciences and Health Visiting
Theme title:	<b>The effect of burn-out syndrome's risk factors and prevalency on mental health and communication</b>
Problem identification:	Behaviour, internal balance is one of the basic condition in patient leading and self-defence. Surveys that bare the factors (motivation, anxiety, interpersonal character type) behind the nurses' behaviour are very useful for the patients and the workers as well
Number of the thesis what may be submitted:	3
Relevant research methods:	questionnaire, observation

Necessary and relevant statistic methods:	descriptive statistics, chi-square test, ANOVA, t-test
Which major/specialization can advertise the theme:	Nursing and Patient Care major Nursing specialization, BSc nursing, MSc nursing
