

THESIS TOPICS PROPOSAL FORM

The thesis topics proposition form is obliged to be filled by lecturers to be nominated as supervisor. Please provide the title of topic concerning at least three topics and short summaries of the propositions (in 4-5 sentences), research methods to be applied (questionnaire survey, documentation analysis, observational study etc.), statistics methods to be applied (preferably with the exact statistical testing) at least in three topics. After this please define the maximum estimated number of theses that may be submitted concerning a specific topic (i.e. not per semester), by providing the opportunity of the objectives' specificity, and thus the authenticity of the work. Finally please indicate the department/specialization(s) in that the announcement of the topic is proposed.

Please be informed that your proposed topics are supervised by the Thesis Methodology Committee, The Committee decides whether they can be announced. The Committee is authorized to accept the provided proposal in modified form, You will be informed in all cases concerning whether the topic can be announced and its final content!
